### ERAFP, an SRI institutional investor

Created by the French retirement-reform law of August 21, 2003, ERAFP has since January 1, 2005 managed the retirement benefit rights of French government and local civil servants and the staff of French public hospitals, through a fully funded scheme, based on a point system.

Administered by representatives of the beneficiaries and employers in the three branches of the public service, as well as by three qualified experts, ERAFP applies a socially responsible investment (SRI) policy and one of asset diversification in order to combine the values of public service with the search for performance. With almost 4.6 million beneficiaries, 51,000 employers and contributions of approximately 1.7 billion euros per annum, ERAFP is one of the world's largest public pension funds in terms of members, and one of Europe's largest SRI institutional investors.

The institution's SRI approach is described in a charter adopted in March 2006, available on the ERAFP website ([www.erafp.fr](http://www.erafp.fr)). It embodies the following five values:

- o Rule of law and human rights
- o Social progress
- o Democratic labour relations
- o The environment
- o Good governance and transparency
